

MODEL 06260

PROTECTIVE COVER FOR WIND TRACKER

INSTRUCTION SHEET 06260-90
REV 04-98

INTRODUCTION

The Protective Cover provides moisture and dust protection for the Wind Tracker display. The clear window permits easy viewing of display information while the sealed buttons allow operation of brightness and reset controls.

INSTALLATION

The Protective Cover may be installed on any flat surface. It is supplied as two components; a Front Cover and a Back Plate. Installation is as follows:

1. Select a location for the Display and Protective Cover that permits good viewing.
2. Using the back plate as a template, mark locations for 8 screws and the clearance hole for wiring connections.

3. In mounting surface, drill 8 mounting holes. (1/8" drill). Drill clearance hole in mounting surface for wires.
4. Pass sensor cable and power supply cable through back plate. Attach sensor wires to display terminals. Insert power supply plug into jack on back of display.
5. Attach display to back plate using 2 ea no 8 screws provided.
6. Align front cover and back plate with holes in mounting surface. Fasten using 8 self tapping screws provided.

MAINTENANCE

Dirt or dust accumulation may be cleaned using soap and water and a soft cloth. Do not use abrasive cleaners. **DO NOT USE SOLVENTS.**
