## AIO 2 Sonic Weather Sensor

**The AIO 2 Sonic Weather Sensor is a complete high performance weather sensor using Met One Instruments' proven 2D sonic technology.**

This technology provides reference grade accuracy without moving parts and a built in compass used for automatic alignment of the sensor. The temperature and humidity elements are integrated into an IP65 sealed module with a quick disconnect for ease of calibration in the field. The pressure element is precisely calibrated and temperature compensated for outstanding performance. The AIO 2 is designed for surface meteorological applications where accuracy and reliability matter.
